

UTROGESTAN® (PROGESTERONE) 100MG CAPSULES

Information leaflet for patients prescribed Utrogestan 100mg Capsules

WHAT IS UTROGESTAN 100MG?

Utrogestan 100mg Capsules contain a natural progesterone, derived from plants and identical in structure to the hormone produced by our body.

It comes in a pack of 30 capsules to be taken as advised by your doctor in combination with a oestrogen treatment in women who have a uterus.

WHAT CAN I EXPECT FROM MY TREATMENT WITH UTROGESTAN 100MG?

When taking oestrogen for Hormone Replacement Therapy (HRT), the lining of the uterus (endometrium) may build up and cause problems. The addition of a progesterone, such as Utrogestan 100mg, prevents this.

CHECK-UPS

Irregular bleeding or spotting can also occur during the first 3 months of taking continuous combined HRT. There is no need to be concerned but do report it to your healthcare professional at your 3-month review.

If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet. You can also report side effects directly via the Yellow Card Scheme at: www.mhra.gov.uk/yellowcard or search for MHRA Yellow Card in the Google Play or Apple App Store. By reporting side effects you can help provide more information on the safety of this medicine.

PRECAUTIONS

If you are allergic to soya, DO NOT take this product.

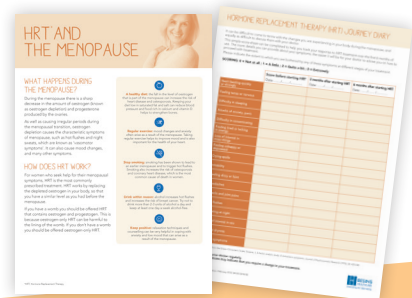

Like all medicines, Utrogestan 100mg may cause side effects, although not everybody gets them. Please refer to the package insert contained in your pack of Utrogestan 100mg Capsules for the list of possible side effects.

WHERE CAN I GET MORE INFORMATION?

Further information is available in your package insert. Contact your doctor if you have any further questions about your Utrogestan 100mg treatment.

Visit www.utrogestan.co.uk to find out more about Utrogestan 100mg and access information relating to:

- HRT risks and benefits
- Lifestyle changes to help you go through the menopause
